At a glance...

I have worked with a wide range of clients including small, medium, enterprise, multinational and not for profit organizations across various sectors including telecommunications, insurance, utility, media, e-commerce, logistics and government. My experience has exposed me to both green field and legacy projects in onsite, offsite and remote capacities. I have worked alone and in teams ranging from 3 to 50 members adopting development approaches ranging from traditional waterfall model to agile development. I have been involved in all phases of the software development life cycle including analysis, design, development, testing, deployment and maintenance and have touched every aspect in creating a successful web presence including Web development, Web design, Web marketing and Web strategy.
